Mark,

Our current wells are:

2, 3, 4, 6, 7R,8R,9,10R,11R,12,13,14R, & 15

These are all active wells for the production of drinking water. All other wells have been abandoned and properly sealed.

We have 2 surface water intakes — I am not sure how you have them labeled. Our current intake is the one installed in 2013, the other is still in place but the piping to the plant has been cut and capped.

Let me know if you have any other questions.

Thanks,  
Mary

Hi Mary,  
I left you a voice mail. I am compiling references for the West Vermont documentation record. Below is a list of the Speedway municipal wells. Can you confirm that these wells are active or inactive. Did I miss any. If any of the wells are inactive, can you also tell me what their status is (abandoned, monitoring wells, maintenance, clean out, etc.) ?  
Thanks
